TECHNICAL EXPERTIES

- **Languages:** Kotlin, Java, C/C++, Python, Dart, HTML, CSS, JavaScript, TypeScript
 - **Technologies:** Android SDK, Jetpack Compose, XML, Flutter, MERN Stack
Angular, Node.js, Express.js, Docker, Spring Boot
 - **Databases:** SQL, NoSQL (Firebase and MongoDB)
 - **Dev Tools:** Android Studio, VS Code, Git/Github
-

PROFESSIONAL EXPERIENCE

Software Engineer (Full Stack)

Eicore Technologies, Gurugram (*Absorbed from Essentia.Dev*)

March 2026 - Present

- Transitioned to Eicore Technologies following the client's internal absorption of our dedicated product engineering team.

Essentia.Dev, Noida

June 2025 - Feb 2026

- Architected and developed "OneBuzz," a scalable SaaS platform, implementing a Monorepo and Graph architecture to optimize data flow and ensure highly modular, maintainable code.
- Engineered comprehensive automated and End-to-End (E2E) test suites, ensuring production stability, seamless functionality, and significantly reducing regression risks.
- Demonstrated expertise in system architecture and technical ownership by building a reliable, high-performance enterprise product that led to the team's direct acquisition by the client.

Software Developer (Mobile and Backend)

Wit By Bit, Kolkata

Jan 2024 - May 2025

- Developed robust, cross-platform mobile applications, resolving critical architectural issues and writing high-performance asynchronous code to manage complex state and real-time updates.
- Optimized mobile app performance by designing custom UI rendering widgets for large datasets, heavily reducing UI thread blocking and managing resource constraints effectively.
- Established automated CI/CD pipelines using Docker and GitHub Actions, streamlining release cycles and enforcing high-quality coding standards.
- Collaborated in a dynamic environment, mentoring peers, taking ownership of e-commerce feature rollouts, and integrating analytics to track user behavior.

SDE Intern

Learnship Technologies, Chennai

Sept 2023 - Jan 2024

- Collaborated within an agile software development group to design, build, and maintain enterprise web applications.
- Debugged complex issues across multiple systems, ensuring data integrity and contributing to technical documentation.

EDUCATION

VIT University Master of Computer Application	9.01 CGPA Sept 2022 - May 2024
Jharkhand Raksha Shakti University B.Sc. (Honours) in Computer Application and Cyber Security	9.19 CGPA July 2019 - July 2022
Chitarpur Inter Colleger Intermediate Science [PCM]	80.6% June 2017 - March 2019
R.P.C. Saraswati Vidya Mandir 10th Board	7.8 CGPA March 2017

PERSONAL PROJECTS

<u>JAC eLearning</u>	<i>Dart, Flutter, Firebase, OneSignal</i>	<u>Source Code</u>
Designed and developed a modern Android app providing study resources for Jharkhand Board students, showcasing my android development prowess.		
<u>JRSU App</u>	<i>Android Jetpack Compose, Kotlin, Firebase, OneSignal</i>	<u>Source Code</u>
Built a final year college project app delivering notifications and resources directly to students, demonstrating proficiency in modern Android development tools which performing CRUD operations exposed using a RESTful API made with Android Jetpack Compose using Firebase Realtime Database		
<u>Typing Test WebApp</u>	<i>Angular, Typescript</i>	<u>Source Code</u>
Created an Angular web app to enhance typing speed, highlighting web development capabilities and UI/UX skills.		
Harber	<i>Dart, Flutter, Firebase</i>	<u>Source Code</u>
A Concept Booking application for Barber slot booking Designed and developed a clean and modern android application using Flutter		

CERTIFICATIONS

- HackerRank:** 5 Star in Problem Solving
- Udemy:** Certification in ML using Flutter
- LinkedIn:** Angular Essential Training
